

## Pro-File Roof Racks

The ProRac Pro-File roof rack comes complete with Lo-Pro tracks and Pro-File crossbars. This rugged, aerodynamically designed rack is completely adjustable to accommodate a wide variety of loads and applications. The Pro-File crossbars are designed with a unique profile extruded from Aluminum 6063 alloy providing a hefty 150 lb. load capacity. The crossbars are designed with a radius to match the contours and lines of the vehicle giving a clean finished look.

### Engineered Advantages:

- Crossbar feet are injection molded using UV stabilized super tough nylon
- Various crossbar widths available to accommodate different vehicle types (see fit chart)
- Aluminum construction provides strength and rigidity while being light weight and corrosion resistant
- Integrated T-Slot design allows for easy installation and removal of accessories and also conceals mounting hardware
- Crossbars can be easily removed if needed for garage clearance
